

# Pathways to becoming a teacher

## There is more than one pathway to becoming a teacher.

The first step for many is studying teaching as an undergraduate university degree. Many universities and TAFE institutions also have Indigenous student support services. You can enquire during the enrolment period.

### Find and compare courses at:

- Education and Training provides information and advice to help plan your teaching career, no matter your age or circumstances.
- CourseSeeker helps you find the course that is right for you. Course Seeker also includes information on financial assistance and applying for courses.
- CompareED compares institutions and study areas based on real life student experiences.

### Other pathways towards a future career in teaching:

- TAFE can help you gain entrance qualifications towards a university pathway and help you prepare for a university degree.
- Studying a post graduate qualification in addition to your undergraduate degree.
- The Australian Government High Achieving Teachers Program supports two alternative, employment-based pathways into teaching for high achieving individuals committed to pursuing a career in teaching.

Australian Government

A joint Australian, state and territory government initiative.
